// experience

IT System Analyst — Local Government of Sorsogon · Contract

Aug 2024 – Present

- Develop and maintain web-based, database-driven applications for government operations, including the PMS.
- Analyze business requirements and translate user needs into practical technical solutions.
- Troubleshoot application, data, and system issues, and own testing, debugging, and QA across the lifecycle.

Co-Owner / Operations & IT Support — The Rig Builders · Self-employed

Jul 2020 – Present

- Manage business operations, digital systems, and technology-enabled workflows.
- Administer Google Workspace and maintain the company website and Shopify store.

DevOps Engineer — Chevron Holdings Inc. (Manila Shared Services Center) · Internship

Dec 2019 – May 2020

- Built automated test scripts with C#/.NET and Selenium, and assisted with Selenium Grid Server setup.
- Supported Java-based test automation across SAP, Salesforce, and Maximo.

Software Quality Assurance Engineer — Samsung Electronics · Internship

Aug 2019 – Nov 2019

- Developed mobile test automation scripts using Selenium and Java.
- Performed software testing and validation, and documented results and findings.

// selected projects

Procurement Monitoring System (PMS)

In progress

`Next.js · React · TypeScript · Tailwind CSS · PostgreSQL · Docker`

- Full-stack platform where staff submit and track procurement requests through structured workflow stages.
- Built authentication, role-based access, CRUD, workflow stages, and audit history on PostgreSQL, run in Docker.

GovGuide

ph-govguide.vercel.app

`Next.js · React · TypeScript · Tailwind CSS · Claude Code`

- Guide to Philippine government services: where to go, what to bring, the steps, and the fees, with local offices by city.
- Every guide cites its official source and last-checked date; rebuilt through AI-assisted development with Claude Code.
